

Week - 10

Team Members: Ankith Indrakumar, Akhil Patil Bagili, Shanmukha Sri Harsha Anvillla

Team Project Title: GitInsight

Course: CS 161 Section 01

Date: 03-31-2024

Summarizing the progress including the current milestone in progress with the target completion date.

- Completed the integration of the landing page, sign-up, and sign-in functionalities with backend services to manage user data effectively.
- Successfully integrated AI model for enhanced query response accuracy, allowing for a more interactive user experience with the GitInsight chat interface.
- Implemented security measures to ensure the safety of user data and seamless API communication.

Milestone 5 (3/24 - 3/31):

- Finalizing Chatbot Design and Features- Aimed at ensuring that Chatbot component design is user friendly and has all the features available to the end user.
- Addressing the product issues based on the feedback from the partner team.

Void: N/A

Bug: Issue must be fixed

- User Session Management: Identified issues with user session persistence post-login. Currently, working on a fix to ensure sessions are maintained effectively.

Enhancement:

- Improve AI Response Accuracy: Based on feedback, enhancing the AI's ability to understand more complex queries about Git commits.
- User Interface Polish: Focused on refining the UI/UX based on user feedback to ensure a seamless experience.

List of Finished Features

- Comprehensive user authentication system integrating sign-up, sign-in, and session management.
- Full integration of AI model with the chat interface, enabling users to interact with GitInsight using natural language.
